

How to manually install packages in R 3.4.4 to use in mineR

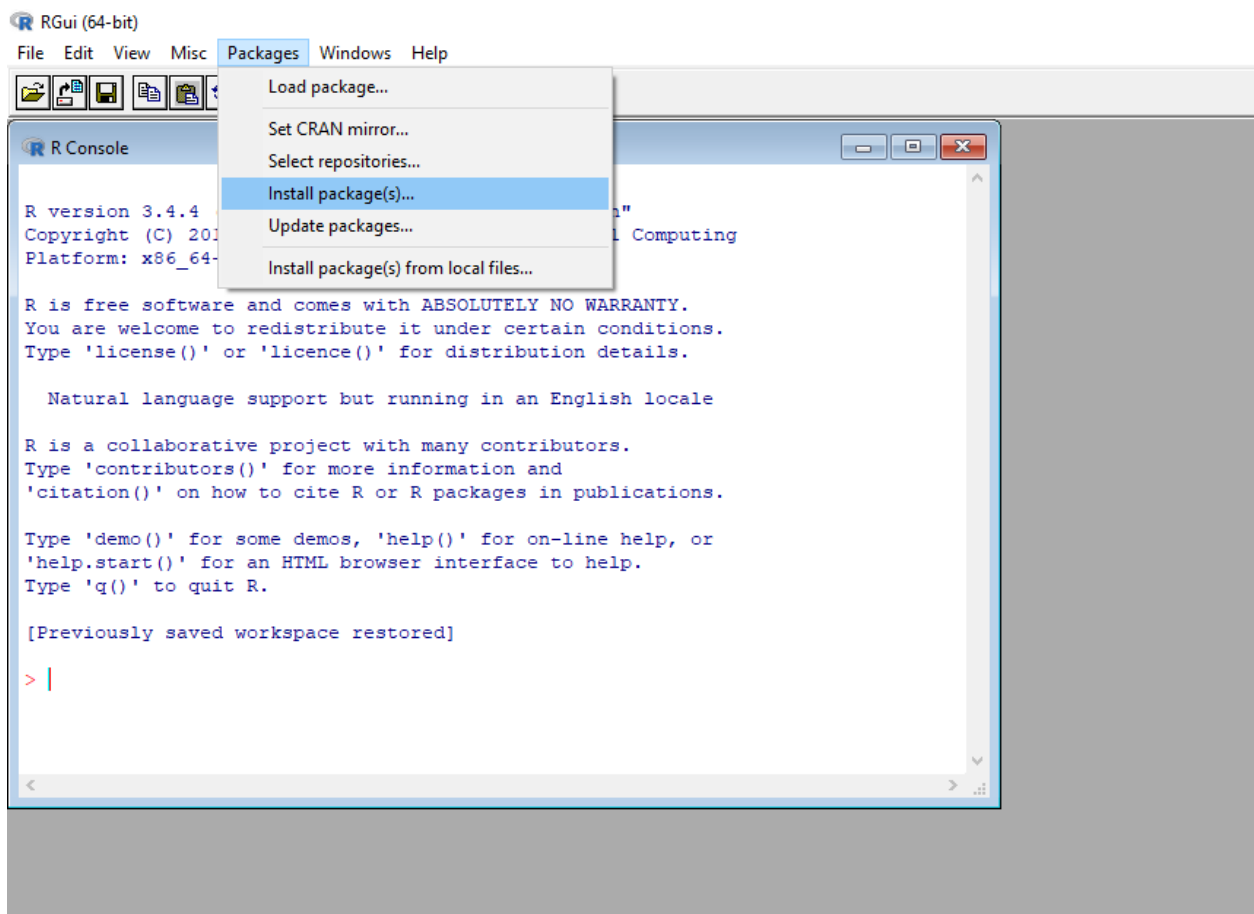

Step 1

Make sure to download and install R CRAN 3.4.4 ([Link](#))

Open **R x64 3.4.4** from the start menu

Go to the drop-down menu of **Packages**

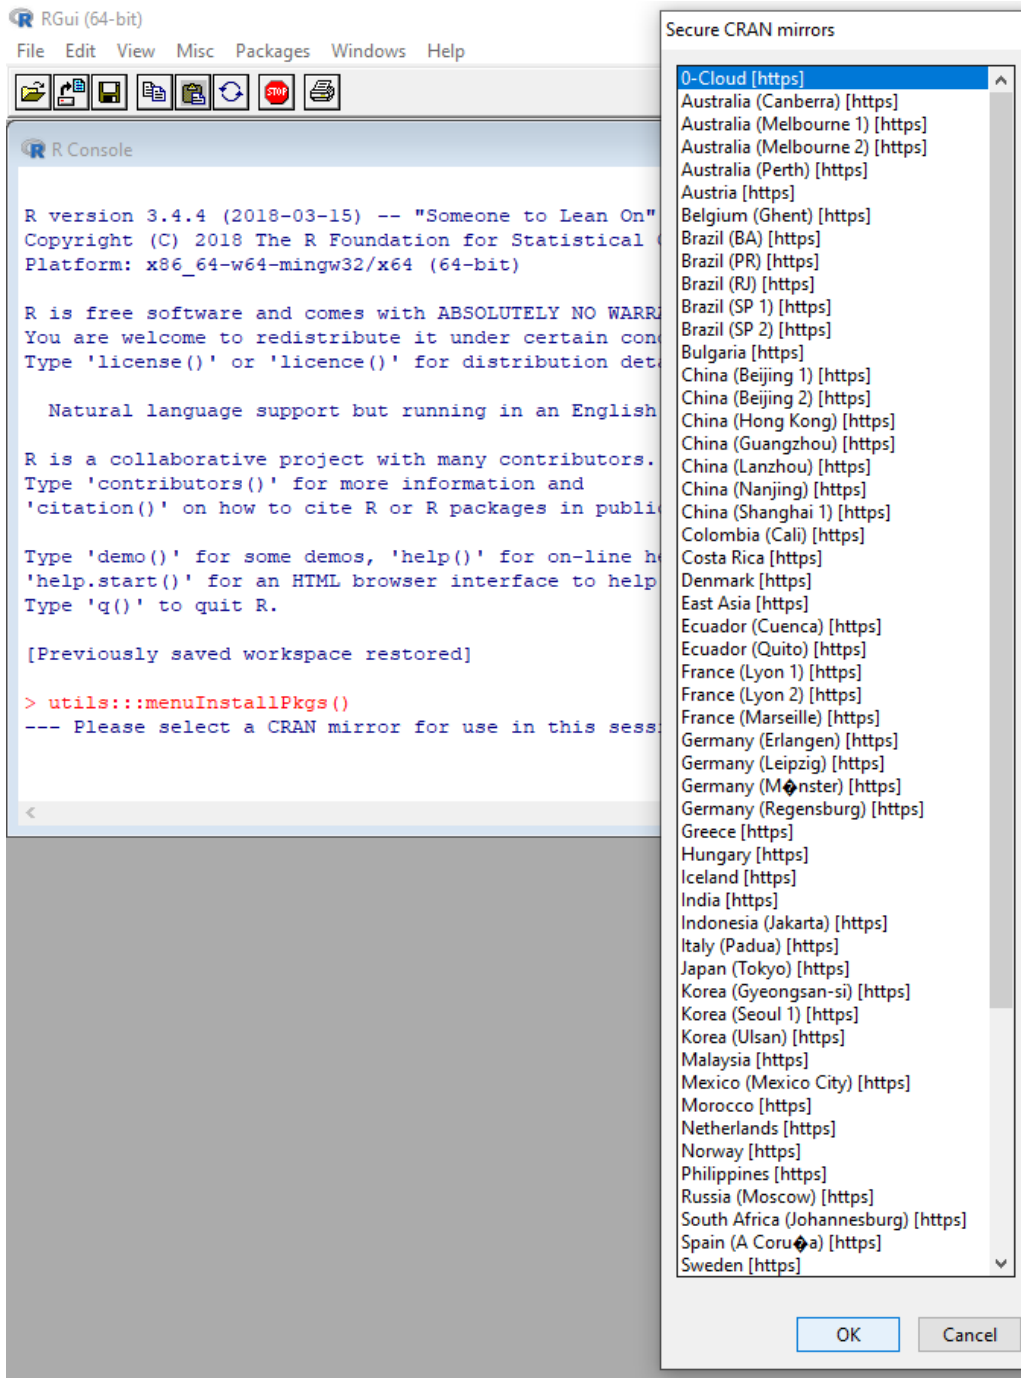

Select **Install package(s)...**

Step 2

If the window “Secure CRAN mirrors” appeared

Select any server closer to you (or use the default **0-Cloud**) and press OK

Step 3

A new popup window will appear called **Packages**

Look for the following packages (You can select multiple while pressing Ctrl) then click OK

"dplyr"

"Hmisc"

"png"

"gplots"

"moments"

All packages should be installed

Try rerun the mineR script
